govinity

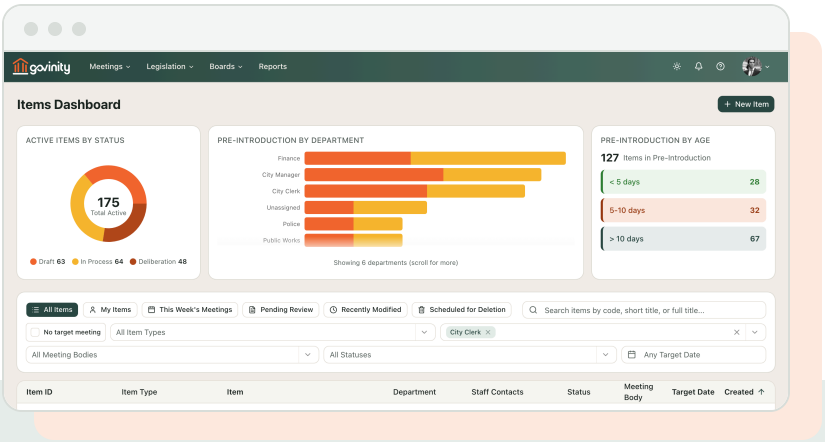

LEGISLATIVE MANAGEMENT FOR LOCAL GOVERNMENT

GOVINITY LEGISLATIVE MANAGEMENT

Every public decision. On the record. In one place.

Govinity runs the whole path of a public decision, from first request to public archive, on one platform with one record.

It's set up the way your agency already works, with AI where it matters most. AI assists; the clerk decides.

One platform. Three products.

Govinity Tenure
Seats and terms

Govinity AgendaCycle
Request to final action

Govinity Gavel
Votes, minutes, video

Govinity Access (public portal) is included with every product. Govinity Gateway (securely connects your existing website, records system and AI tools) is available as an add-on.

WHY GOVINITY

Six differences you can hold us to.

One record, start to finish

Agendas, meetings, minutes and boards on one platform, with one record from request to archive.

We've done this job

Our team helped build this category, plus former municipal clerks in key staff roles.

Your rules, your workflows

Configuration included with every implementation, at no additional charge.

Support that answers

Same-day response, every time. Live in-app support, even during evening meetings.

Accessibility built in

Built to WCAG 2.1 AA. Every attachment is checked the moment it's added, and fixed with a click.

Fair price, best value

One license for the whole organization, with no per-user fees. It's public money. We price like it.

TALK TO THE PEOPLE WHO BUILT IT

The partner public service deserves.

ONE PLATFORM, ONE RECORD

Every decision follows the same path. We run all of it.

Most agencies run it on separate tools, often from different vendors, and staff lose hours moving information between them. In Govinity, an item keeps one identity from first request to public archive.

Board seated · Drafted · Reviewed · On the agenda · Debated · Voted · Recorded · Archived

MOST AGENCIES TODAY: SEPARATE TOOLS FOR EACH STEP

Boards and commissions | Agenda software | Meeting and video software | Minutes software | Archive

WITH GOVINITY

One platform, one record, from board seat to public archive

WHY IT MATTERS

- **Less retyping and reconciling**
  Nothing gets re-entered between systems.
- **Faster answers to records requests**
  The full history of a decision is in one place.
- **A record the clerk can stand behind**
  Votes, motions and minutes tie back to their agenda item.
- **A public that can follow along**
  Residents find, follow and comment on decisions, with no account needed.

About Govinity

Govinity helps local governments and public agencies keep every public decision on the record, in one place. Our team helped build one of the first web-based agenda management systems and helped grow Granicus into the category's largest platform. We saw what this software became under private-equity ownership, so we built what we no longer had the freedom to build: a complete system that works the way each agency already does. Govinity is founder-led, and managing public meetings and the decisions made in them is our only business.
